

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

AMERICAN JOURNAL OF BOTANY

DEVOTED TO ALL BRANCHES OF BOTANICAL SCIENCE

ESTABLISHED 1914

EDITED BY A COMMITTEE OF THE
BOTANICAL SOCIETY OF AMERICA

EDITORIAL COMMITTEE

C. E. ALLEN, Editor-in-Chief,
University of Wisconsin

WILLIAM CROCKER,
*The Thompson Institute
For Plant Research, Inc.*

H. H. BARTLETT,
University of Michigan

C. STUART GAGER, Business Manager
Brooklyn Botanic Garden

ARTHUR H. GRAVES,
Brooklyn Botanic Garden

R. A. HARPER,
Columbia University

I. F. LEWIS,
University of Virginia

C. L. SHEAR, *Bureau of Plant Industry*
(Representing American Phytopathological Society)

The Journal is published monthly, except during August and September. Subscription price, \$6.00 a year. Postage to Canada, 20 cents; to other foreign countries (except Mexico and Cuba) 40 cents a volume on annual subscriptions. Single copies 75 cents. Back numbers, 75 cents each; \$7.00 a volume, post free.

The pages of the Journal are open to members of the Botanical Society of America, or to candidates approved for membership.

Manuscript offered for publication should be typewritten, and should in all cases be submitted to the Editor-in-Chief.

Papers are limited to 20 pages in length, exclusive of plates, except that additional pages may be arranged for at cost rate to authors (approximately \$3.00 a page).

Proofs should be corrected immediately on receipt, and returned to American Journal of Botany, Brooklyn Botanic Garden, Brooklyn, N. Y.

Illustrations, other than zinc etchings, and tabular matter should, in general, be restricted to approximately ten percent of the number of pages of text. Authors may be charged at cost rates for illustrations and tabular matter in excess of that amount (approximately \$6.40 a page for tabular matter; 15 cents per square inch for half-tones).

Separates should be ordered when proof is returned. Fifty copies without cover will be supplied free; cover and additional copies at cost.

Remittances should be made payable to American Journal of Botany. Ten cents must be added to all checks not drawn on New York City banks.

Claims for missing numbers should be made within 30 days following their date of mailing. The publishers will supply missing numbers free only when they have been lost in the mails.

Correspondence concerning editorial matters should be addressed to Prof. C. E. Allen, University of Wisconsin, Madison, Wisconsin.

Business correspondence, including notice of change of address, and directions concerning reprints, should be addressed to American Journal of Botany, Brooklyn Botanic Garden, Brooklyn, N. Y., or 41 North Queen Street, Lancaster, Pa.

All Metal Cases For Botanical Laboratory

For its valuable collection of mounted botanical specimens the University of Pennsylvania required a convenient method of storage that would give complete protection against moisture, dust and vermin. After a thorough investigation, Dr. True, of the Botanical Laboratory, installed fifty-four All Metal Herbarium Cases.

The All Metal Herbarium Case

"VERY MUCH PLEASED"

UNIVERSITY OF PENNSYLVANIA, PHILADELPHIA
Cambridge Botanical Supply Co., Waverley, Mass.
Gentlemen: We are glad to be able to report that the Herbarium Cases have been coming in in very good condition and I am advised by our Dr. True that he is very much pleased with them.

Very truly yours,

BOULTON EARNSHAW, Purchasing Agent.

Constructed so that dust, moisture and insect pests can enter only when the door is open. Partitioned to provide 21 standard compartments. Finished in dark green or black enamel. Dimensions: 17 x 38 x 42½ in. Order Number 10-40 J. Price, crated, F.O.B. Waverley, \$100.00

CAMBRIDGE BOTANICAL SUPPLY COMPANY

Laboratory Equipment for All Sciences

WAVERLEY, MASS., U. S. A.

A Real Vasculum

CAPACIOUS—to hold a good day's collection.

STRONG—to withstand the rough wear of field usage.

Attractively finished in fine green japanning, with hinged cover running the full length of case, wire latch, handle for hand-carrying and metal loops for shoulder strap.

Made in 3 sizes:

A	16 x 7½ x 5	inches	each	\$3.50
B	19 x 8½ x 5½	inches	each	3.75
C	21 x 9½ x 6	inches	each	4.00

No. 1558

- 1538. PLANT COLLECTING CASE OR VASCULUM.** A well constructed metal case, finely enameled inside and outside. The door, which is provided with an easily operating catch, opens the entire length. Size $15\frac{3}{4}$ by 5 by $7\frac{1}{4}$ inches. Complete with leather shoulder strap and snaps.....each **2.80**
10% discount for lots of 6.
- 1558. PLANT PRESS.** A simple, strong, portable plant press made of wood lattice work. When used with No. 1530 Absorption Paper the specimens dry very rapidly. Fifty specimens can be easily dried at one time in this press. Size $11\frac{3}{8}$ by $16\frac{3}{8}$ inches. Complete with leather straps and ten sheets of No. 1530 Absorption Paper. each **2.75**
10% discount for lots of 12.
- 1530. ABSORPTION PAPER.** A heavy felt paper, very absorbent. This paper is recommended for use in No. 1558 Plant Press. In packages of 100 sheets. per package **3.85**
10% discount for lots of 12 packages.

No. F8841

F8841. HERBARIUMS. Made in two sizes, uniform in design with the Atlas Note Books. The portfolio form permits the specimens to be mounted scientifically according to the genus and species to which they belong. The plan also permits adding to or removing from the collection at any time. Hints on collecting, pressing and mounting specimens are found on inside cover pages. Each sheet contains a legend for classification and an index is furnished.

Leitz Microscopes are the Standard of the World

Leitz Research and Photomicrographic Microscope "AA," outfit 30, with complete substage illuminating apparatus "a," and three-lens condenser N.A. 1.40, triple nosepiece, apochromatic objectives 16 mm., 4 mm., oil immersion 2 mm., N.A. 1.32, compensating eyepieces No. 6 and 12, in mahogany cabinet.

Microscope Stand "AA"

It is especially recommended for Research Investigations and Photomicrography.

For this purpose stand "AA" has been selected as standard by the leading laboratories of the U. S. Government, the Hospitals, Universities and Industrial Institutions throughout this and other countries.

The mechanical construction is of utmost rigidity and every part of its adjustment of thorough precision.

Leitz Apochromatic Objectives are individual in Quality and their Optical Efficiency embodies the very latest achievements in optical science, as developed by the Leitz Research Department.

The Leitz Apochromats Excel In

Range of numerical aperture

Definition of image and resolving power

Flatness of Field

Color correction

SPENCER SUPREMACY

In Microtome Building
is shown in

Rotary Microtome No. 820

The only Rotary Microtome ever built
with an **incline-plane feed**.

It completely overcomes the inaccuracies
usually encountered in other Rotary Micro-
tomes, due to the up-and-down movement
of the object.

In this microtome the feed and the move-
ment are **entirely independent**.

Spencer Rotary Microtome No. 820
complete with knife..... **\$180.00**

ITS SUPREMACY

has gained for it an international reputation for perfection. It is in use in every important
laboratory in America and in leading laboratories throughout the world.

A Binocular Microscope for Research Work

Microscope FAE8
Price, \$227.50.

Microscope FAE, binocular type, using Single Objectives for the full range of powers, is a most useful instrument for prolonged observation. It is used with great satisfaction by leading research and laboratory workers. The following advantages are offered:

As the eyepiece tubes are mounted in a parallel position, both eyes are free from the strain of accommodation or convergence.

The user is given the impression of increased penetrating power, permitting him better to interpret what is seen.

It yields brilliancy of field and improved quality of image.

Provides maximum range of adjustment for interpupillary distance; left eyepiece is adjustable.

As the right eyepiece is rigid and vertical, the Camera Lucida may be used if desired.

Write for literature or other information on this or other Bausch & Lomb Microscopes.
